

Model No: JS-SGZ003

Products Introduction:

SGZ003 Tripod turnstiles are compact and cost-effective entrance solutions. Designing for smooth and silent operation, reducing power consumption, wear and tear. It is suitable for areas with a high traffic.

The vertical stainless steel compact version, offer high operating reliability in a small casework, ideal for sites where space is an issue. By receiving a signal from the access control system, or pushing button, it allows the entry of one person in a time. Entering into different directions are electronically controlled. Default mode is to lock the mechanism until a valid authorization signal is received. If you want to set one side free, you can adjust the mechanism. In case of emergency, the horizontal arm will drop to allow free passage.

Application Location:

Using tripod turnstiles is a popular choice when checking tickets at sports stadiums, amusement parks, and university facilities. They eliminate the need for attendants at entrances and provide a means to count the number of pedestrians entering into a facility. These turnstiles paired with card readers and electronic operation are the most popular choice for subway systems and can be found in most of them.

Access Control System (Optional)

SWIPE CARD

Access with authorized card and payment card sex piece swipe to open the way

IRIS RECOGNITION

Use the authorized eyes of Iris Recognition to pass through the entry gates

FINGERPRINT RECOGNITION

Access with authorized fingerprint authentication

PALM VEIN RECOGNITION

Use authorized palm vein recognition to pass into

COIN/TICKET

Use disposable coins to coin through to enter

FACE RECOGNITION

Use authorized face recognition to enter

QR CODE

Scan in with authorization QR code and barcode

MANUAL OPERATION

Manual use of wired and wireless to open gates for entry

Features

Reliability

- Alloy steel tripod hub prevents mechanical wear
- Casework and tripod arms manufactured in SUS304 stainless steel
- Electromagnets for lock are used only when being activated. They are in standby mode when the device is idle.
- KARSUN patented compact mechanism ensures the long life of the lubricating oil inside.
- High quality electrical components

Safety and User-Orientated Design

- Drop arm designed for emergency purpose
- No exposed screws, safer for the user.
- Smooth operation designed for mass transit application
- The pictogram on the device indicating access permission and direction of movement
- Special designed case shape, user-friendly for passenger to punch card or finger.
- Anti-tailgate

Easy Integration

- Flexible reader installation plate. Customers can easily integrate with third party reader
- Standard electrical interface for third party device.
- By using compact mechanism, the turnstile has more space inside for integration
- KARSUN provides integration service in factory, with board and peripherals installed, ensuring compliance of the system. When the turnstile is delivered, just plug it in and do the setting. Save the cost of installation.

Specifications

Power Supply	AC 220V/110V, 50/60Hz
Operating Temperature	-28 °C– 80 °C
Operating Humidity	5%–85%
Working Environment	Indoor / Outdoor both, IP54 Standard
Rated Power	60W
Flow Rate	25– 48 passage/minute
Casework Material	SUS304 (SUS 316 for option)
Mechanism	Semi automatic electromagnetic mechanism with hydraulic buffer function (full automatic brushless motor for option)
Control System	Dry contact
Emergency Alarm function	Yes
Dimension	420*330*980MM + arm length 500MM
Net Weight	45kgs
Material Thickness	1.5mm
MCBF	Electromagnetic mechanism 5 million cycles , brushless motor 8 million cycles
Warranty	2 years
