

Swing Turnstile

Model No:JSTD9151-21

Products Introduction:

The JSTD9151-21 Swing gates are stylish waist-high security speed gates that operate on the swing open principle with glass (or plastic) panels acting as the barrier gate. Depending on which side of the Karsun Swing Lane the person approaches, the gate when authorised, will swing open in the opposing direction allowing them passage through the controlled lane. The Karsun Swing Lane has the ability to embed most manufacturers access control readers beneath its top glass cover, and with the intuitive LED user indication and guidance, this security speed gate encompasses safety with high traffic flow capacity. The Karsun Swing Lane is offered with different dimensions of swinging gates, which enables lane widths of up to 1000mm.

Application Location:

Using swing turnstiles is a popular choice for any sites where requires wide passage (for people carrying large parcels, or the disabled) strict pedestrian access control (anti-following) and fast accessing rate(at 40-45persons/minute), for example, station, hotels, banks, clubs, office buildings, gyms.They eliminate the need for attendants at entrances and provide a means to count the number of pedestrians entering into a facility. These turnstiles paired with card readers and electronic operation are the most popular choice for entrance and exit systems and can be found in most of them.

Access Control System (Optional)

SWIPE CARD

Access with authorized card and payment card sex piece swipe to open the way

IRIS RECOGNITION

Use the authorized eyes of Iris Recognition to pass through the entry gates

FINGERPRINT RECOGNITION

Access with authorized fingerprint authentication

PALM VEIN RECOGNITION

Use authorized palm vein recognition to pass into

COIN/TICKET

Use disposable coins to coin through to enter

FACE RECOGNITION

Use authorized face recognition to enter

QR CODE

Scan in with authorization QR code and barcode

MANUAL OPERATION

Manual use of wired and wireless to open gates for entry

Features

Reliability

- Alloy steel swing hub prevents mechanical wear
- Casework and swing arms manufactured in SUS304 stainless steel+paint
- Electromagnets for lock are used only when being activated. They are in standby mode when the device is idle.
- KARSUN patented compact mechanism ensures the long life of the lubricating oil inside.
- High quality electrical components

Safety and User-Orientated Design

- The arm designed for emergency purpose
- No exposed screws, safer for the user.
- Smooth operation designed for mass application
- The pictogram on the device indicating access permission and direction of movement
- Special designed case shape, user-friendly for passenger to punch card or finger.
- Anti-tailgate

Easy Integration

- Flexible reader installation plate. Customers can easily integrate with third party reader
- Standard electrical interface for third party device.
- By using compact mechanism, the turnstile has more space inside for integration
- KARSUN provides integration service in factory, with board and peripherals installed, ensuring compliance of the system. When the turnstile is delivered, just plug it in and do the setting. Save the cost of installation.

Specifications

Brand name	KARSUN
Motor type	DC brushless motor
Flow rate	40-50people/minute
Passage width(mm)	≤1000
Rated Power	50W
Cabint material	SUS 304;1.5mm top lid/1.2mm side
Infrared sensor	8 pairs
Input/Output signal	dry contact/relay signal
Dimension	1508*160*1019mm
Net weight	55KG
Gross weight	57KG
IP	IP44
Operating Temperature	-10 °C- 60 °C
Operating Humidity	5%-85%
Working Environment	Indoor/Outdoor covered
Voice prompt	Yes
